

Simple 2 Zone Banqueting Suite

PROJECT SPEC:

Simple Banqueting Suite:
Client wanted their medium sized Banqueting Suite, which had a partition wall, to be more flexible.

They specifically wanted individual Mic & Line Inputs in the partitioned rooms (Zone 1 & 2); iPods/PC & Lectern, receptions & presentations.

But when NOT partitioned they must work together.

By Group allocating the Active Input wall plates and wall Remotes the facilities staff could switch easily between the room combinations.
