

PRE-EXISTING SYSTEM

Paging Mic

One More Zone  
MA40T 70/100V Mini-Amplifier

There are often circumstances where a client requires an additional zone to be added to a pre-existing system, such as after renovations or for temporary usage. The MA40F & MA40T provide a solution to tap off any 70/100V Line speaker circuit and add additional functionality such as local inputs and control.
